

Internet access for residents

Wireless – a courtesy service

- Free wi-fi is provided in the lobby, dining hall and lounges.
- Some rooms may be too far for the signal, which also depends on your equipment.
- If you require dedicated Internet access, you have several options.

Own your Internet access

- **Wireless phone**

Subscribe to a cellular plan with hotspot feature.

Pricy, but big companies Verizon, AT&T, and T-Mobile have sub-brand (discount) carriers as well.

- **Wireless Hotspots**

The major wireless carriers also provide wireless internet only hotspots for heavier users.

Wireless Home Internet

T-Mobile and Verizon have home internet wireless routers available.

Although the websites don't indicate they are available and work at the dormitory, they have been tested and do work. Check with the local T-Mobile and Verizon stores.

Spectrum

For the highest possible and most consistent speed, along with TV service, Spectrum Cable and Internet service may be possible.
